BSM

EXCELLENCE IN PERIPHERALS

FALL 1990 CATALOG

COMPUTER RESELLER NEWS 90 PREFERRED DISTRIBUTOR

A COMPANY PROFILE

AN INTRODUCTION

BSM Computers (Business Solutions in Micro) is a manufacturer and a national distributor of high performance computer peripherals and systems. Located in Richardson, Texas (a suburb of Dallas), BSM sells to and services dealers throughout North America.

Having started operations in August, 1986, BSM concentrated on a limited number of products and emphasized a very high level of service to go along with extremely competitive prices. Our commitment to service, consistently competitive prices, and a product offering that includes only high performance products offered by quality manufacturers helped build an enormous dealer base throughout North America.

COMPANY GROWTH

BSM is a well-funded organization backed by a highly talented and dedicated group of individuals. In a relatively short period of time, we have been able to put together an infrastructure that is highly receptive to the needs of the dealer. It is this commitment to the success of the dealers that has been instrumental in providing us the financial track record that is matched by few distributors in the country.

LOOKING TO THE FUTURE

Our goal at BSM is to continue to develop high-performance products that will provide above average margins to our dealers. These product offerings will be backed by the finest tech support and RMA service in the country.

At present, in excess of 90% of the RMA replacements are being shipped back to the dealer within 24 hours of receiving the defective product. Our goal is to make that in excess of 98%. In order to realize that goal, the company has invested in integrated software that includes full serial number tracing capabilities.

In short, ***we are dedicated to giving service a new meaning in this industry!***
